

1: Global vs Au

① Choropleth map

② Line chart

Filter

① Map require not

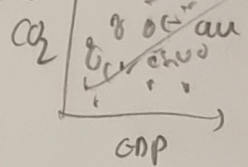

- keep Idea 1A - and 1A for choropleth map

② Strongly purple

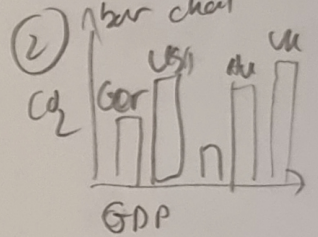

- comparing with global for full story
 => keep 2A for better details
 - Idea 4A as 4B is not appropriate

2: Global Emission

① Scatter plot

n GDP

Categorise

Grouping in sections for narrative

① Global Situation vs Au

- Est global context + for Au to fit in
 - world choropleth map, GDP vs Emission

② Inside bubble chart

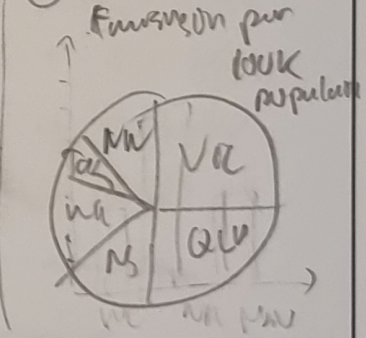

- Drill down in Au details for Au Audience

3: Emissions store wide

① Choropleth map

② Pie chart

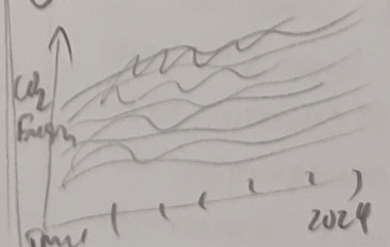

Combine & Refine

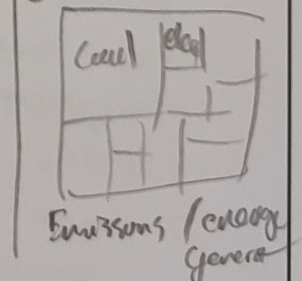

1. Start global - use world map to check global CO2 / capita to compare with Au
2. Add context + economy
3. National + Temporal for deeper details in Au
4. Future Insights

4: Emissions in Scarr

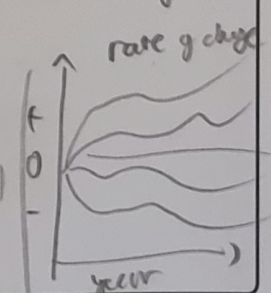

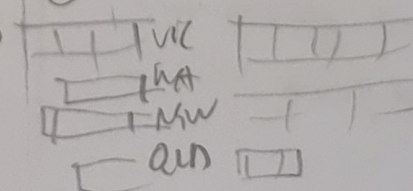

① Stacked area chart

② Frequency

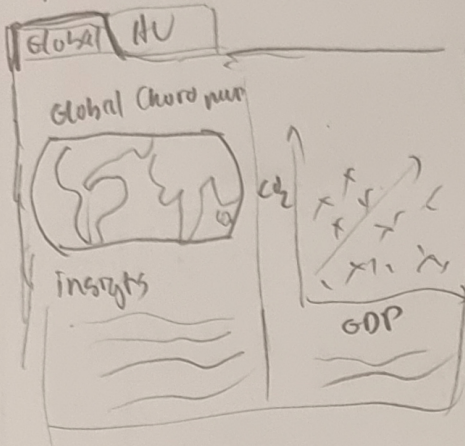

5: Energy Transition

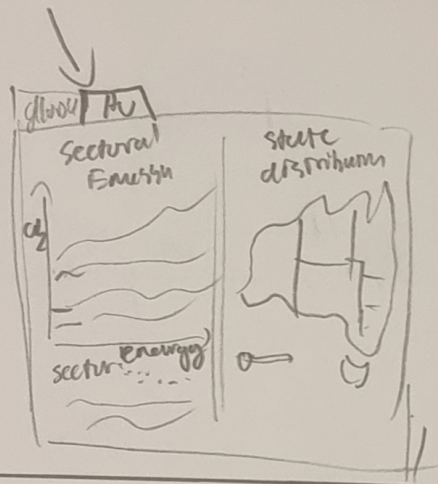

Summarise and question

- 1) Is there actual link between GDP n Emission
- 2) Which section of Au create the most Emission?

Australia vs Global: Emission Landscape

- tab-based navigation dashboard
- Fixed layout

Title Context-Swap Dashboard

Description tab-based navigation dashboard

Components / Operations

Components:

- Global views
 1. World Choropleth map
 2. Global bubble chart
- AU view:
 1. AU stacked bar chart
 2. AU Choropleth map

Operations:

- view swappings
- Year slider for Global map, GDP, and AU Map
- Brush for sectoral chart
- Filter by country and sector for GDP and sector Map

Pro & Cons

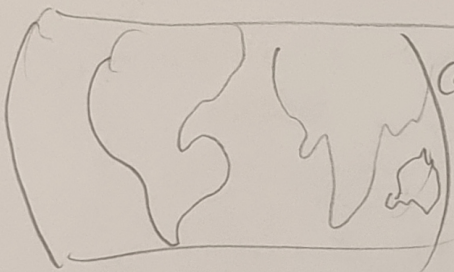

Pros:

- Clean view - separate 2 context => not overwhelming user
- Good for side by side comparison

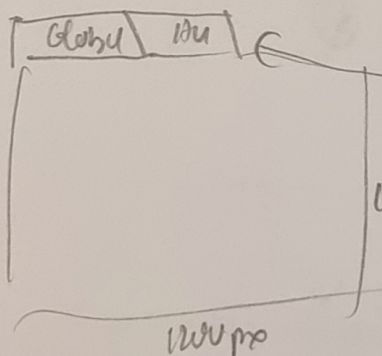

Cons:

- Break the narrative flow
- Hidden context
- Inefficient use of space
- lack of compatibility with diff devices.

Parti / Focus

Main chart showing clear details for each country with AU highlighted

Focus on user-controlled context switching

Fixed layout for consistent content space

Title Professional 2x2 Dashboard

Description: Fixed grid design inspired by expert dashboard in Powerbi

Components / Operations

- Components

1. world Map (choropleth)
2. AU map (Dot dist map)
3. Global bubble chart
4. the stacked area chart

- Interactions

1. Time slider for Global related charts
2. Cross-filtering and linked interactions
3. Filter by sector to have better overview and observe the change overtime

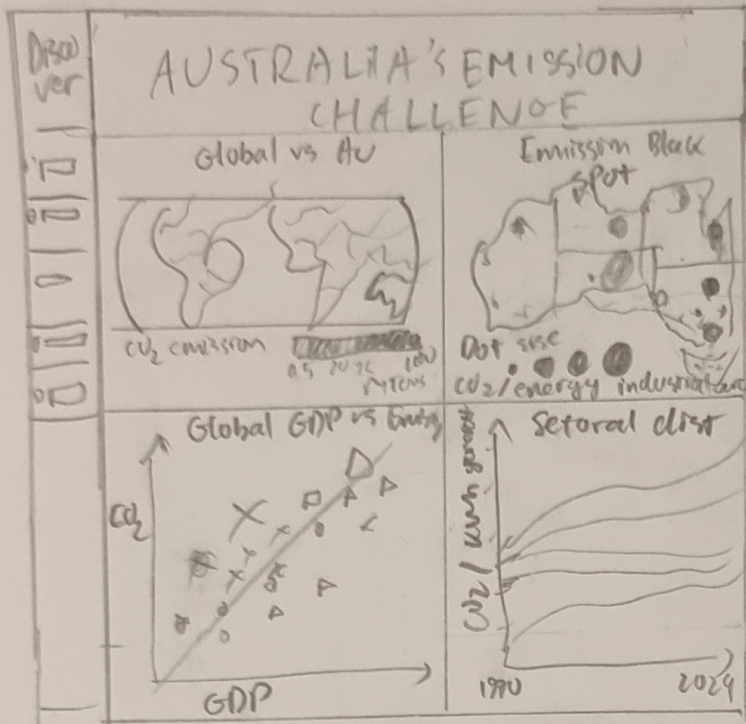

Pro & Cons

- Pros:

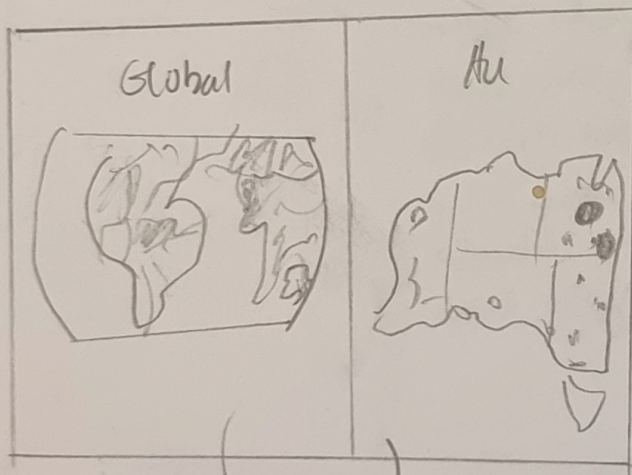

- Informative: All information displayed on one fixed screen, giving complete overview at once
- Good for comparison
- Style control by linked interaction

- Cons

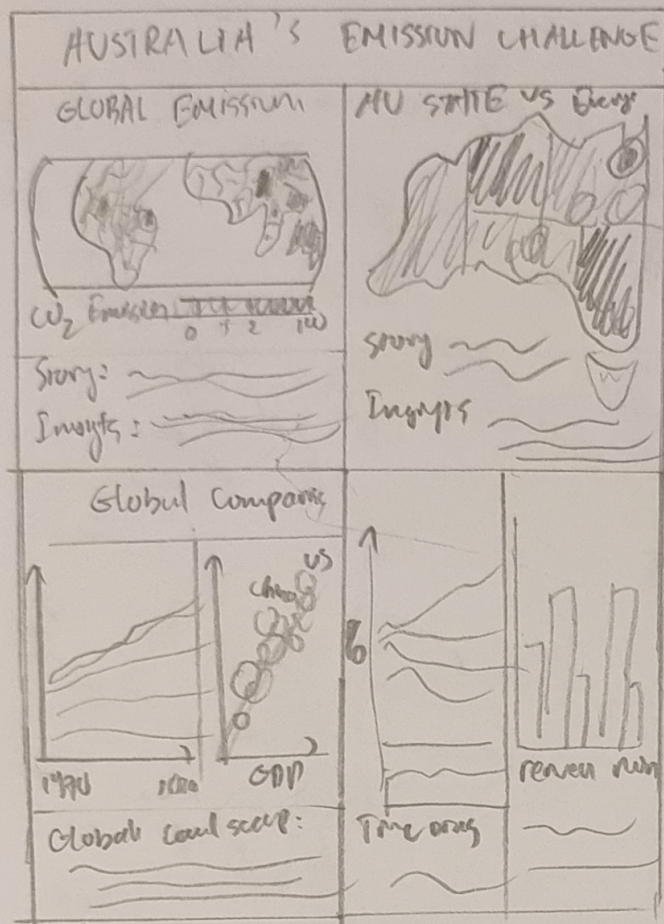

- lack of storytelling
- overwhelmed from dense chart
- layout hierarchy is problem
- chart size affect readability

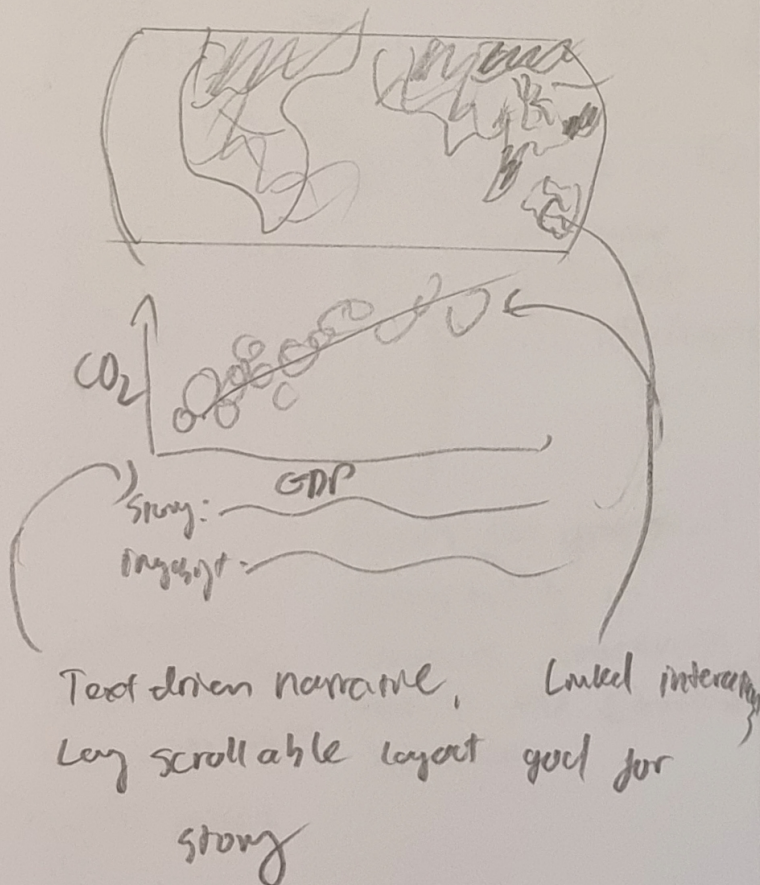

Parti / Focus

- Focus on comparing and simultaneously overview.
- side by side maps encourage audience to directly compare the 2 land scape

Parti / Focus

Title Split - col Narrative DCS

Description 2-column scrollable dashboard enabling storytelling

Components / Operations

Components

1. World Map
2. Bubble chart
3. area stacked chart
4. Au Map
5. line chart
6. Grouped bar chart

Interaction:

1. vertical scroll
2. Time slider
3. Linked filters

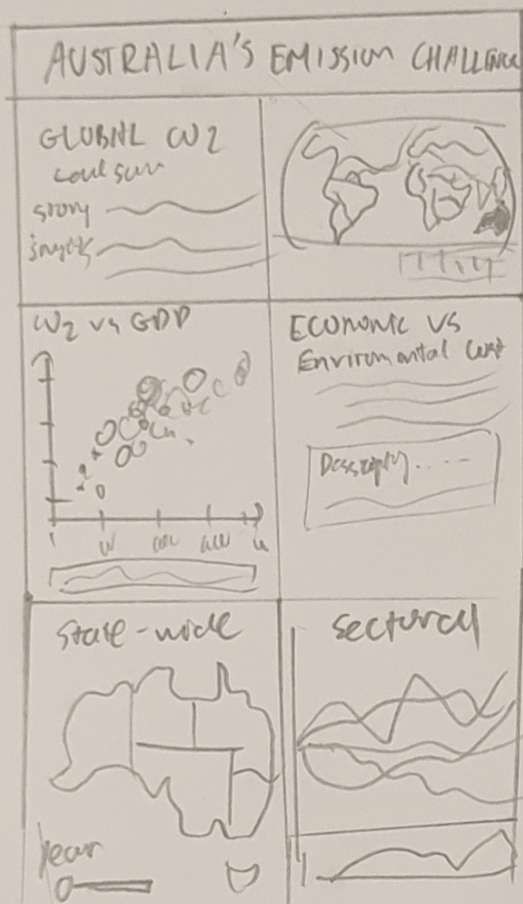

Pro & Cons

Pros:

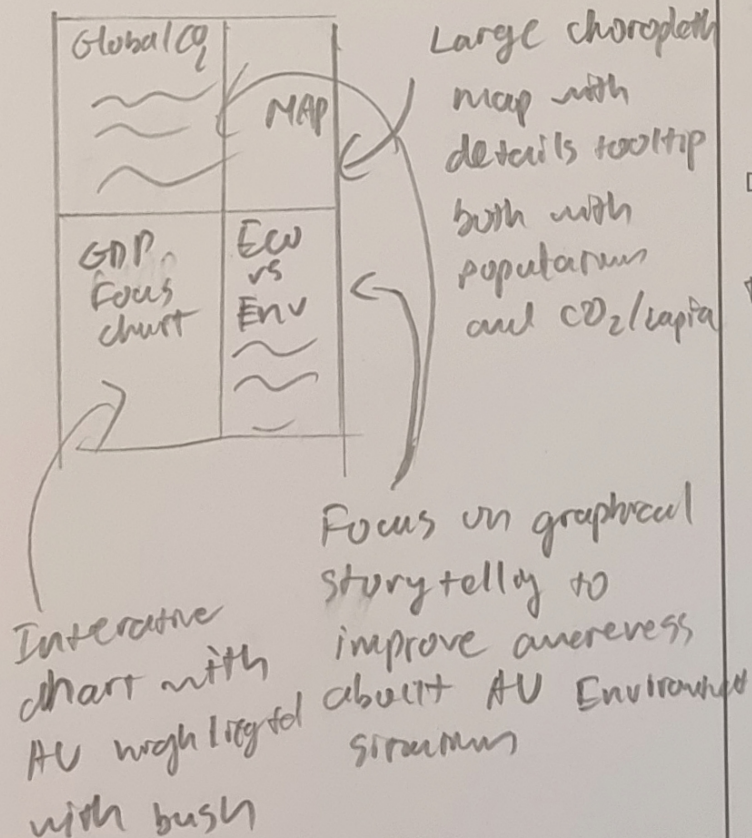

- Clear Narrative
- Compact design
- Clean and easy to be adopt by CSS

Cons:

- Visually repetitive
- Potential misalignment
- Wasted space

Parti / Focus

Components / Operations

Components:

1. World choropleth map
2. Global bubble chart
3. AU choropleth map
4. Sectoral line chart

Operations:

- Vertical scrolling
- Time sliders
- Tooltips
- Linked highlights
- Filtering for bubble chart
- Country search in bubble chart

Details

- Single webpage dashboard that is scrollable and no view changing required
- Narrative text explains the viz and transforms into valuable insights
- Appropriate level of interactive exploration
- More balanced and symmetry layout
- Full storytelling.
